

# WHY YOU SHOULD HUNT TURKEY!

## Turkey is healthy, wild and local

Packed with pure protein while remaining low in cholesterol and bad fats, wild turkey meat is as lean and green as it gets. No steroids, antibiotics or other man-made chemicals spoil this truly organic, fair-chase meat, as wild turkeys forage on only natural foods found in their woodland habitat.

## Hunters are the original conservationists

The majority of the founding fathers of American conservation were sportsmen. They recognized the need for responsible management of both habitat and wildlife to save disappearing species. Today, through the sale of hunting licenses and excise taxes placed on sporting equipment created by the Pittman-Robertson Act in 1937, sportsmen and women provide the majority of funding for wildlife in the U.S.

## Hunting promotes sustainability

Hunting promotes healthy wild turkey populations by managing their numbers through regulated harvest. Hunters ensure the habitat adequately supports healthy wild turkey numbers.

## Save the Habitat. Save the Hunt.

The NWTF Save the Habitat. Save the Hunt. initiative is a charge that mobilizes science, fundraising and devoted volunteers to give the NWTF more energy and purpose than ever. Through this national initiative, the NWTF has committed to raising \$1.2 billion to conserve or enhance more than 4 million acres of essential wildlife habitat, recruit at least 1.5 million hunters and open access to 500,000 acres for hunting, shooting and outdoor enjoyment. Without hunters, there will be no wildlife or habitat. The NWTF is determined to Save the Habitat. Save the Hunt.
